PERSONAL PROJECTS

Full Stack (MERN) Student Portal
- Developed a **Student Portal** where students can **sign up, log in, and apply for courses** . The system includes **admin approval or rejection** for applications, and students can **download their admit card** . Built with **React.js** and **Tailwind CSS** for a responsive UI and **Express.js** for backend functionality, ensuring smooth communication between users and the admin panel.

Loan Management System (React.js, Supabase)
- Developed a **Loan Management System** featuring a user dashboard to **request loans, view history** , and an **admin panel** to **approve or reject** requests. Integrated **Supabase authentication** and **real-time database** functionality for seamless data flow.

Multipage Quiz App (HTML, CSS, Bootstrap, JavaScript)
- Built a **multi-page quiz application** with **sign-up and login using regex validation** . Includes **three quizzes (HTML, CSS, JavaScript)** , **dark/light mode toggle** , and **quiz reattempt restrictions** . Implemented theme persistence and logout functionality for a smooth user experience.

Pepsi Clone (HTML, CSS, Bootstrap)
- Built a **responsive clone** of the Pepsi website focusing on layout accuracy, hover animations, and consistent branding using **Bootstrap** for grid and responsiveness.
